
A genome (solid) and window-shuffled copy (dashed)
O. dioica
other Oikopleura
held-out appendicularians
non-target tunicates
hits per Mb at or above
score (bits)
O. dioica OKI2018
O. dioica OSKA2016
O. dioica OdB3
O. longicauda
O. albicans
O. vanhoeffeni
B. stygius
M. erythrocephalus
F. borealis
C. intestinalis
C. savignyi
S. clava
T. democratica
B genome-scan hits; at the genome threshold, by what lies upstream on the same strand
O. dioica OKI2018
O. dioica OSKA2016
O. dioica OdB3
O. longicauda
O. albicans
O. vanhoeffeni
B. stygius
M. erythrocephalus
F. borealis
C. intestinalis
C. savignyi
S. clava
T. democratica
score (bits)
selenoprotein gene (106)
copy of a known selenoprotein (19)
KKSU (4)
repeated sequence (3)
nothing found upstream (30)
genome threshold
below it (1194; orange: after a selenoprotein gene)
comparative threshold (hits listed down to it)
C controls: RefSeq mRNAs with a TGA frame upstream of a hit of 20 bits or more
H. sapiens, Oikopleura
H. sapiens, RF00031
C. intestinalis, Oikopleura
C. intestinalis, RF00031
best score per mRNA (bits)
selenoprotein mRNAs
other mRNAs
